

Application Control

McAfee Application Control prevents zero-day and APT attacks by blocking execution of unauthorized applications.

McAfee

Features

Protect against zero-day and APTs without signature updates.

Uses McAfee Global Threat Intelligence and McAfee Threat Intelligence Exchange to provide global and local reputation of files and applications.

Strengthen security and lower ownership costs with dynamic whitelisting that automatically accepts new software added through your trusted channels.

Efficiently control application access with McAfee® ePolicy Orchestrator® (McAfee ePO™) software, a centralized platform for management of McAfee security solutions.

Reduce patch cycles through secure whitelisting and advanced memory protection.

Keep systems current with the latest patches using trusted updaters.

Enforce controls on connected or disconnected servers, virtual machines, endpoints, fixed devices such as point-of-sale terminals, and legacy systems such as Microsoft Windows XP.

Allow new applications based on application rating or self-approval for improved business continuity.

Maintain user productivity and server performance with a low-overhead solution.

Easily protect legacy systems and modern technology investments.

Description

McAfee Application Control prevents zero-day and APT attacks by blocking execution of unauthorized applications. Using our inventory feature, you can easily find and manage application-related files. It groups binaries (EXEs, DLLs, drivers, and scripts) across your enterprise by application and vendor, displays them in an intuitive, hierarchical format, and intelligently classifies them as well-known, unknown, and known-bad applications. Using whitelisting, you can prevent attacks from unknown malware by allowing only known good whitelisted applications to run. Works with GTI, TIE and ATD.

Supported platforms

Microsoft Windows (32-bit and 64-bit)

Embedded: XPE, 7E, WEPOS, POSReady 2009, WES 2009, 8, 8.1 Industry, 10

Server: 2008, 2008 R2, 2012, 2012 R2

Desktop: NT, 2000, XP, Vista, 7, 8, 8.1, 10 Linux

Red Hat/CentOS 5, 6, 7

SUSE/openSUSE 10, 11

Oracle Enterprise Linux 5, 6, 7

Ubuntu 12.04
