

Host Intrusion Prevention System (HIPS)

McAfee® Host Intrusion Prevention for Server delivers specialized web and database server protection to maintain system uptime and business continuity.

McAfee

Features

Enforce the broadest IPS and zero-day threat protection coverage across all levels: network, application, and execution.

Reduce time and costs with one powerful, unified console for deployment, management, reporting, and auditing of events, policies, and agents.

Patch endpoints less frequently and with less urgency.

Manage compliance with easy-to-understand actionable views, workflow, event monitoring, and reporting for prompt and proper investigation and forensics.

Description

McAfee® Host Intrusion Prevention for Server delivers specialized web and database server protection to maintain system uptime and business continuity along with the industry's only dynamic and stateful firewall to shield against advanced threats and malicious traffic. In addition, it also provides signature and behavioral intrusion prevention system (IPS) protection. McAfee Host Intrusion Prevention for Server

reduces patching frequency and urgency, preserves business continuity and employee productivity,
 protects data confidentiality, and simplifies regulatory compliance.
