

## Threat Intelligence Exchange (TIE)

McAfee® Threat Intelligence Exchange enables adaptive threat detection and response by operationalizing intelligence across your endpoint, gateway, network, and data center security solutions in real time.

---

McAfee

### Features

Adaptive threat protection closes the gap from encounter to containment for advanced targeted attacks from days, weeks, and months down to milliseconds.

Collaborative threat intelligence is built out of global intelligence data sources combined with local threat intelligence gathering.

You get immediate visibility into the presence of advanced targeted attacks in your organization.

Relevant security intelligence is shared in real time among endpoint, gateway, network, and data center security solutions.

You are empowered to make decisions on never-before-seen files, based on endpoint context (file,

process, and environmental attributes) blended with collective threat intelligence.

Integration is simplified through the McAfee Data Exchange Layer. Implementation and operational costs are reduced by connecting together Intel Security and non-Intel Security security solutions to operationalize your threat intelligence in real time.

## Description

McAfee® Threat Intelligence Exchange enables adaptive threat detection and response by operationalizing intelligence across your endpoint, gateway, network, and data center security solutions in real time. Combining imported global threat information with locally collected intelligence and sharing it instantly, allows your security solutions to operate as one, exchanging and acting on shared intelligence. McAfee Threat Intelligence Exchange narrows the gap from encounter to containment from days, weeks, and months down to milliseconds.

## Specifications

### **McAfee Threat Intelligence Exchange consists of the following components:**

McAfee Threat Intelligence Exchange Server 1.2.0

McAfee Data Exchange Layer Client 1.1.0

McAfee Threat Intelligence Exchange Module 1.0.1 for VirusScan Enterprise

Additional requirements for McAfee Threat Intelligence Exchange include:

### **McAfee Endpoint Protection**

McAfee VirusScan Enterprise 8.8, Patch 4 with Hotfix 929019, Patch 5

McAfee Endpoint Security 10.1 or later

## McAfee Security Management

McAfee ePolicy Orchestrator 5.1.1

## Virtualization Infrastructure

VMWare vSphere 5.1.0 with ESXi 5.1 or later
