

VirusScan Enterprise (VSE)

McAfee VirusScan Enterprise combines antivirus, antispymware, firewall, and intrusion prevention technologies to proactively detect and remove malware.

McAfee

Features

Protect your files from viruses, worms, rootkits, Trojans, and other threats.

Proactive protection against new and unknown buffer-overflow exploits that target vulnerabilities in Microsoft applications.

The worldwide presence of McAfee Labs enables McAfee VirusScan Enterprise to leverage protection across file, network, web, message, and vulnerability data.

The McAfee ePolicy Orchestrator® (McAfee ePO™) management platform provides centralized deployment, policy configuration and enforcement, and detailed, customizable reporting.

Easily configure policies to manage and remove quarantined items.

Supports users who are using Microsoft Outlook or Lotus Notes.

Description

McAfee VirusScan Enterprise combines antivirus, antispymware, firewall, and intrusion prevention technologies to proactively detect and remove malware. It reduces the cost of managing outbreak

responses, stops zero-day threats, and mitigates the window of vulnerability—the time between the  discovery of a vulnerability and when fixes are deployed. Plus, with McAfee VirusScan Enterprise, you have the flexibility to detect and block malware based on your business needs: on access, on demand, or on a schedule.

Specification

Workstation

Windows 10

Windows 10 for Embedded Systems
