

Network Protection

Cognosec's Network Security service offers tailored defense systems such as Unified Threat Management (UTM) solutions.

Cognosec Services

Description

Developing a network with full-fledged security involves the implementation of many elements and need to be performed by experienced teams of specialists. Cognosec's Network Security service offers tailored defense systems such as Unified Threat Management (UTM) solutions. UTM is the evolution of the traditional firewall and is an all-inclusive security product able to perform multiple security functions within one single appliance such as network firewalling, network intrusion prevention and gateway antivirus (AV), gateway anti-spam, VPN, content filtering, load balancing, and data leakage prevention. The combination of automated scanning and manual search filtering provides you with an extremely efficient and effective way of protecting yourself against even the most pesky attackers.

Specifications

Network protection consists of the policies and practices adopted to prevent and monitor unauthorized

access, misuse, modification, or denial of a computer network and network-accessible resources.
